

Cancer Survivorship E-Learning Series for Primary Care Providers

Health Care Solutions

From the American Cancer Society

The National Cancer Survivorship Resource Center offers a **free, innovative online continuing education program** to educate primary care providers about cancer survivorship. The Survivorship Center, a collaboration between the American Cancer Society and The George Washington University Cancer Institute, is funded by a five-year cooperative agreement through the Centers for Disease Control and Prevention.

The Cancer Survivorship E-Learning Series for Primary Care Providers features content on:

- The role of clinical generalists and specialists in providing follow-up care to survivors of adult-onset cancers
- How to manage long-term and late physical and psychosocial effects of cancer and its treatments
- Survivorship care planning and care coordination

The series is available at no cost and offers continuing education credits for physicians, physician assistants, nurse practitioners, and nurses. New content will be added on an ongoing basis. Each webinar is led by national experts and features a cancer survivor story.

Module 1: Current Status of Survivorship Care and the Role of Primary Care Providers

- Learn about the latest models of delivering follow-up care for cancer survivors.
- View webinars led by national experts who are creating new standards of care at the intersection of primary and cancer survivorship care.
- Listen to the firsthand experience of a breast cancer survivor as she discusses her cancer journey – from diagnosis to treatment and supportive care.

Module 2: Late Effects of Cancer and Its Treatments: Managing Comorbidities and Coordinating with Specialty Providers

- Learn about the common physical effects after treatment and the possible interactions with non-cancer comorbidities.
- View clinically based presentations on implementing a coordinated plan of care with oncology specialty providers and how to manage the late effects.

“In order to effectively care for cancer survivors, primary care providers need education, guidance, and tools.”

– Larissa Nekhlyudov, MD, MPH

More than 3800 individuals from 50 countries have accessed this e-learning series.
